Vision Statement as Professor of Practice

School of Computer Science & Engineering (SCOPE) • Vellore Institute of Technology (VIT Chennai)

01. EXECUTIVE VISION & STRATEGIC PURPOSE

The convergence of generative AI, distributed software engineering, and human-computer interaction (HCI) has fundamentally reshaped the tech industry. Modern enterprise demands computer science graduates who move beyond writing code in isolation to becoming **multidisciplinary product engineers** who master cognitive ergonomics, enterprise design systems, engineering feasibility, and customer-centric product execution.

Leveraging **18+ years of global technology leadership** (IBM Software Labs, Zebra Technologies, ZF Wabco, Ericsson, Samsung, and Infosys) grounded in a foundational **B.E. in Information Technology** and prior engineering college teaching experience, my vision as Professor of Practice at VIT Chennai is to transform **SCOPE** into a national benchmark for *Industry-Academia Synthesis*. I aim to cultivate software engineers who think like architects, design like humanists, and ship production-ready products on day one.

18+ Yrs	50+	5 MNCs	100%
INDUSTRY LEADERSHIP	ENGINEERS & UX MENTORED	ENTERPRISE NETWORK	PRODUCTION-READY FOCUS

02. FOUR STRATEGIC ACTION PILLARS FOR VIT SCOPE

✦ 1. Modernizing HCI & AI-UX Curricula

Introduce hands-on coursework in **Human-Computer Interaction (HCI)**, **Enterprise Design Systems (Figma to React/Flutter Tokens)**, and **AI Interaction Design (IBM Watson, GenAI prompts, Copilot UX)** to bridge computer science theory with high-velocity product delivery.

✦ 2. Studio-Based Capstone Pedagogy

Transition final-year engineering projects from theoretical prototypes to **studio-based capstone incubators**. Implement real-world Agile sprint cycles, heuristic code/UX critiques, and cross-functional product roadmapping mirroring Fortune 500 engineering standards.

✦ 3. Cultivating "Design Engineers"

Pioneer the hybrid **Design Engineer** track—equipping computer science undergraduates with deep proficiency in both full-stack software development and UI/UX design architecture, preparing them for premier dream/super-dream engineering and product roles.

✦ 4. Corporate MoUs & Placement Pipelines

Actively leverage my direct enterprise network across global technology leaders to facilitate **industry-sponsored hackathons**, direct internship-to-hire pipelines, corporate guest lecture series, and high-impact R&D problem statements for VIT students.

03. TANGIBLE DELIVERABLES FOR VIT CHENNAI (2-YEAR ROADMAP)

- **Design Systems & HCI Innovation Lab:** Establish an open-source enterprise UI component repository built and maintained by SCOPE students for real-world enterprise adoption.
- **Industry Capstone Mentorship:** Mentor 15+ high-potential multidisciplinary capstones annually, with a focus on enterprise SaaS, automotive telematics, and healthcare IoT applications.
- **Super-Dream Placement Readiness:** Conduct intensive product-architecture interview bootcamps, code-to-UX design reviews, and portfolio masterclasses for prospective graduates.
- **Executive Industry MoUs:** Facilitate at least 2 institutional engagements and collaborative industry-sponsored initiatives within the first 18 months.
